Describe the flow of costs through a process costing system.

What are equivalent units of production?

Why is the calculation of equivalent units of production needed in a process costing system?

What are conversion costs? Why do we combine materials using process costing and labor using job costing?

Explain how the cost of production of manufacturing material and finished goods, including the cost of material, is calculated in process costing. Describe the calculation of equivalent units of production. How does it affect a cost pool of manufacturing costs, such as, for example, the electricity, i.e. include with the manufacturing overhead.
